

The Top Cybersecurity Weaknesses Most Organizations Face

Jeremiah School – Impact Networking / DOT Security

Introduction

Agenda

- **Insights from Last Months Presentations**
- **State of the Cyber Union**
- **Top 5 Cybersecurity Weaknesses**
- **Future of Cybersecurity**
- **Q&A**

Insights From Last Months Presentations

- **The perspective of a hacker**
- **Being tracked online**

Cybersecurity State of the Union

- **Cyber insurance maturity**
- **Becoming uninsurable**
- **Regulation**
- **Federal Assistance**

Top 5 Cybersecurity Weaknesses

#1 Lack of Employee Training

- **Users are the biggest weakness**
- **Theory vs Practice**
- **Phish testing is only the start**
- **Unmanaged systems lack value**
- **Build a cyber aware culture**

#1 Lack of Employee Training

A group of people in a meeting room, some standing and some sitting at a table, engaged in a discussion. The scene is dimly lit, with a focus on the people and their interaction. The background shows a brick wall and a whiteboard.

What Does Good Look Like?

- **Scheduled**
- **Monitored**
- **Risky User Action Plans**
- **Reporting**

#2 Unknown System Bugs

- **Not all things can be protected**
- **Updates / Patching is key**

#2 Unknown System Bugs

What Does Good Look Like?

- **Know what systems you have**
- **Patch hardware & software monthly – quarterly**
- **Apply critical patches ASAP**
- **Manage patch health**
- **Be resilient**

#3 Lack of Cybersecurity Strategy

- **Build towards resiliency**
- **Understand where your risk are**
- **Manage and reduce those risks**
- **Have an Incident Response Plan**

#3 Lack of Cybersecurity Strategy

What Does Good Look Like?

- **Perform a Risk Audit**
- **Cybersecurity Maturity Roadmap**
- **Tested Incident Response Plan**

#4 Lack of Monitoring

- **Asset Management**
- **Threat Hunting**

#4 Lack of Monitoring

What Does Good Look Like?

- **Clear reporting of users, licenses, subscriptions and devices**
- **Reporting of system health**
- **Properly managed Endpoint Detection & Response (EDR) software**

#5 Outdated Systems

- **Software**
- **Operating Systems**
- **Typically seen in specialized industries**
- **The older the system, the worse it gets**

#5 Outdated Systems

What Does Good Look Like?

- **Do not use unsupported systems**
- **Segment outdated systems**
- **Wrap higher level security controls around higher risk systems**

Top Cybersecurity Weaknesses

#1 Lack of Employee Training

#2 Unknown System Bugs

#3 Lack of Cybersecurity Strategy

#4 Lack of Monitoring

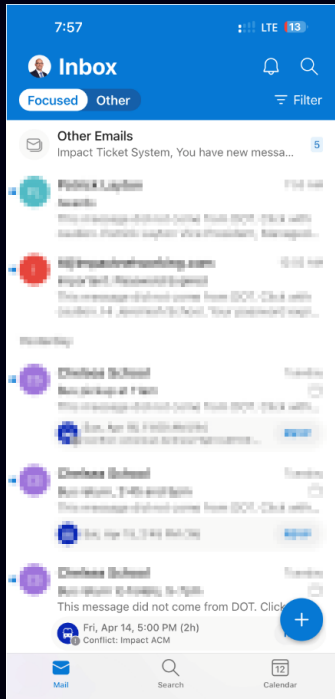

#5 Outdated Systems

Resilience

The Future of Cybersecurity

- **Cybersecurity Insurance Maturity**
- **Moving to Zero Trust**
- **Moving to Passwordless**
- **AI**
- **Budget Alignment**
- **Federal Guidance & Regulation**

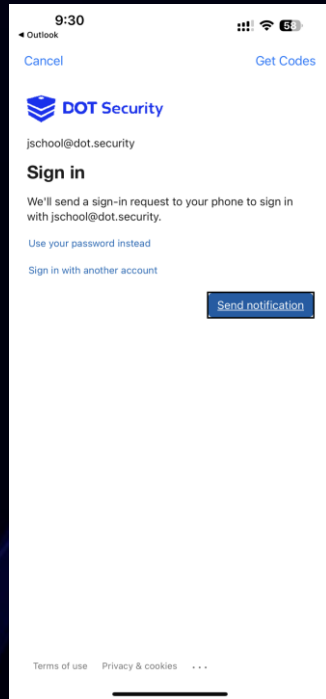

Passwordless

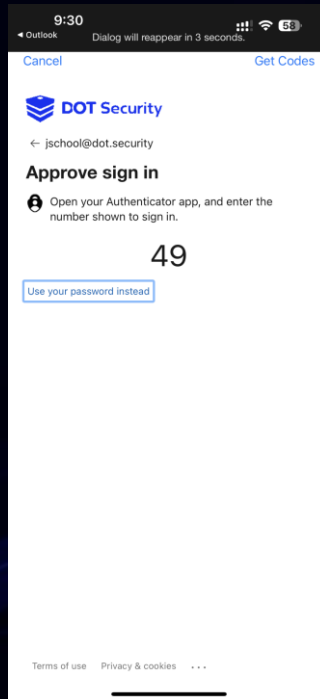

Open Outlook

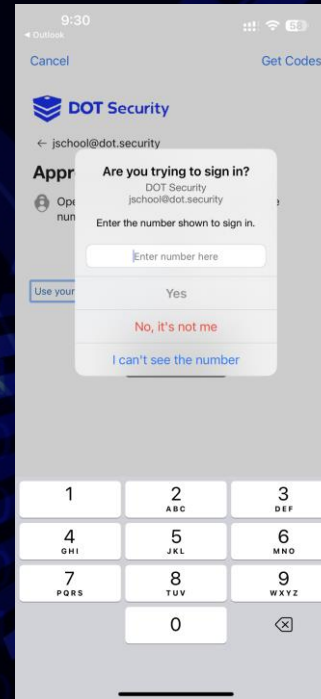

Prompted to Authenticate

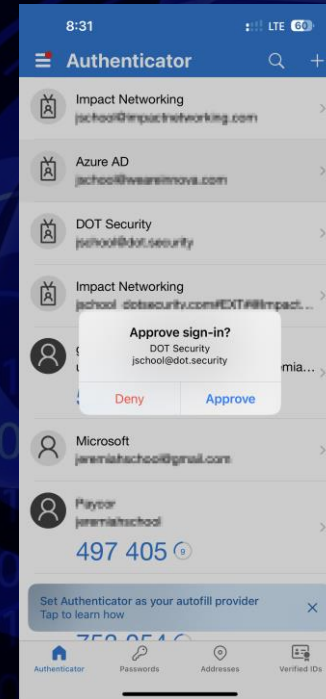

Authenticator prompts to send a login notification

A 2 digit number is provided

The authenticator app asks for the number provided

Once entered, approval needs to be verified

Facial recognition is then validated

Q&A

Thank You
